

JULY 2016

ENERGY SAVINGS NEW CONSTRUCTION

KALIR FARMS BROCKPORT, NEW YORK

THE FARM WAS FOUNDED IN 1996 AND IN 20 YEARS HAS SUPPLIED FRUITS, VEGETABLES, A SELECTION OF HONEY AND MAPLE SYRUP PRODUCTS, AND HOMEMADE JAM IN NEW YORK.

OUR 400 ACRE FARM HAS EXPERIENCED GROWING PAINS AND OUR STATE-OF-THE-ART COLD STORAGE BUILDING WILL SOON BE COMPLETED. ITS CONSTRUCTION WILL FURTHER PROMOTE GREEN SPACE BY THE SAVINGS THAT A SPRAY POLYURETHANE FOAM INSULATION PROVIDES, THUS REDUCING OUR CARBON FOOTPRINT.

SAVING ENERGY AND KEEPING THE PRODUCE FRESH RELIES ON TOTAL ENCAPSULATION OF THE BUILDING'S INTERIOR, USING A MINIMUM OF TWO INCHES OF SPRAYED APPLIED 2 LB. DENSITY POLYURETHANE FOAM INSULATION TO WALLS AND UNDERSIDE OF THE ROOF DECK.
