MOBILE CONTRACTOR RIGS

Our Mobile Spray Rigs are insulated for better ambient temperature control and better yields.

*Because they are insulated, our spray rigs help to control temperatures surrounding your ISO and resin components.

*In cold weather, it is easier to get the components up to spray temperature. In warmer weather, air-conditioning helps prevent overheating of materials and drum distortion while helping to maintain acceptable humidity level.

*In short, by keeping materials at temperatures closer to manufacturer's recommendations, you have better control of the reaction between the A and B components which leads to better product.

Built solid to support equipment and materials

*Double I-beam construction w/stud supports, 16-inch centers (added durability)

*Double axel rated 14,000 lb. (6,356 kg) or 16,000 lb. (7,257 kg)

*Engineered to hold two or three sets of material, generator, compressor **Plus** one or two proportioners

*Rugged design to handle the extreme job environments.

Insulation also:

*Acts as a sound barrier

*Adds structural stability to the trailer

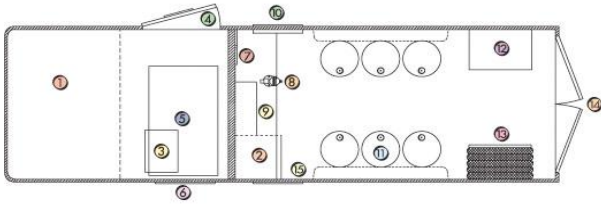

Backed by Warranty

*Your trailer investment is backed with a 1-year limited warranty

*New box trucks are backed with a 1-year limited warranty

LET US DESIGN YOUR TRAILER!

Customize your Rig

Bare Trailer

Insulated
(for better temperature
control)

Non-slip coated flooring or
Diamond plate flooring

Walls- Coated
(color, clear, white)
White board

Personal protection
equipment

Accessories

Spare parts kits

**We build YOUR trailer to meet YOUR
budgetary and performance requirements.**

From entry level to the most sophisticated!

**We don't just build trailers...
we build strong and long-term
relationships!**

Our self-contained
trailers and trucks
provide the ultimate
job site work space.

Choose your RIG

Pull Behind Trailers 12'
– 20' long

Goose Neck Trailers
24' – 28' long

White, Gray or Black

V-nose or flat
6'8" – 8' Inside Height
Barn or Ramp Doors

Box Truck

18' – 28'

Holds two or three
sets of material

Can be out-fitted
with one or two
proportioners

Easiest to maneuver

Better for projects
where parking space
is limited

Ample head room
7.5 ft. (2.3m)

Weight load
dependent on
selected truck size

FEATURES & OPTIONS

Your choice of proportioner (s) hydraulic or electric

Your choice of Graco or PMC spray gun

Your choice of air equipment: Air compressors

Rotary screw compressor (40cfm) integrated with generator

5 HP- 3 phase, two stage, 30 gal horz., Discharge cooler w/Mag

7.5 HP - 3 phase, two stage, 30 gal horz., Discharge cooler w/Mag

Airy Dryer – HX40A 40CFM 115V-1PH

*All air systems include installation and plumbing, refrigerated air dryer, regulators, quick disconnect and correct sizing for application.

Your choice of Generators – combination units (generator/compressor/air dryer)

45KW x 40CFM

45KW x 60CFM

55KW x 40CFM

Heated Hose – 2000 psi (138 bar, 13.8 Mpa) or 3500 psi (241 bar, 24.1 Mpa)

Proper ventilation, engineered louver systems

Insulated partition wall between utilities and cabin

Electrical systems with breaker panel

Hose hanger – 410' capacity

Drum restraints

Two ABC approved fire extinguishers

First Aid kit

OPTIONS:

Insulated

Floor coating

Diamond plate flooring

White panel walls (colored or clear)

Workbench

Cabinets

Spray hose door

Counter lighting

Safety equipment- Fresh air supply - breathing line, board, hood w/V30 hose

Roof Vent

Feed pump system

Air dryer

Machine recirculation system

Gun recirculation system

Band heater with thermostat

Rooftop air conditioning unit

Color coded drum restraints

MOBILE RIGS

MOBILE SPRAY RIGS BUILT TOUGH AND BUILT TO LAST

Single – proportioner layout is available on all mobile spray rigs

Dual – proportioner lay is available on gooseneck or 20 – 28 ft box truck

SOLID INVESTMENT

CLEAR. SIMPLE. DIFFERENT

WORKING WITH PROVEN TECHNOLOGY AND DEPENDABLE SERVICE

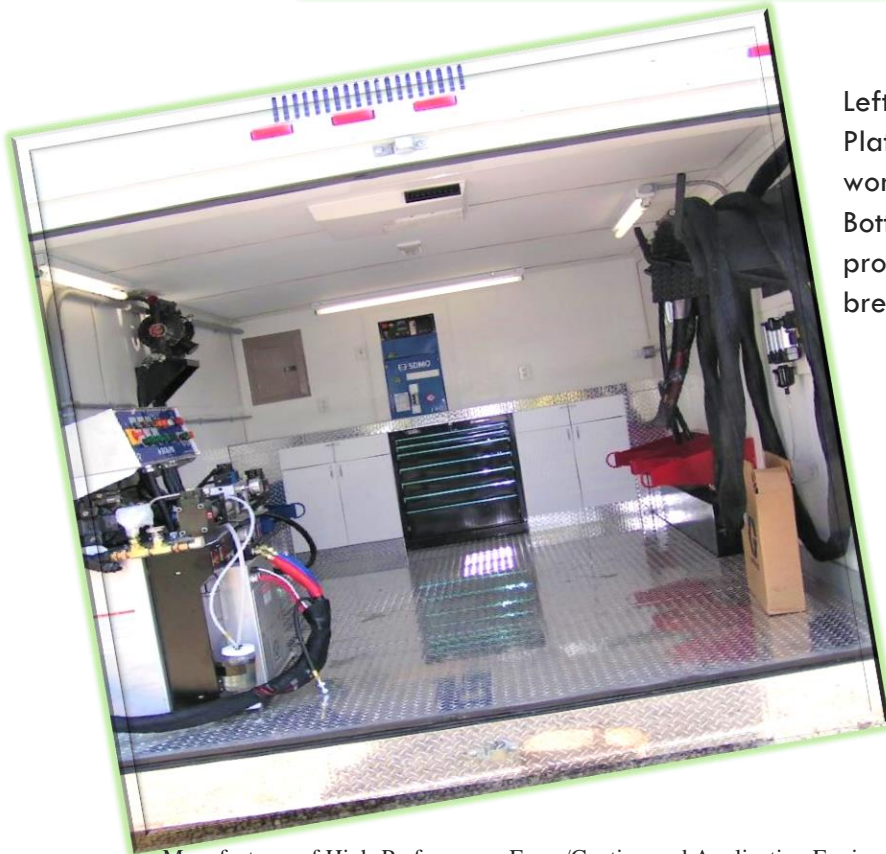

Our rigs are designed for spraying... built to last. Parts and training are all part of our commitment to our contractor base.

Air dryer will keep the humidity levels down within the air supply system.

Generator and air compressor with small footprints save on space.

Air and electrical systems throughout the rig.

Left- Organized Diamond Plate Trailer with built in workbench and cabinets. Bottom- Martech system provides grade D quality breathable air
